

Aon KiwiSaver Scheme

ANZ Cash Fund

Fund update for the quarter ending 30 September 2018

This fund update was first made publicly available on 26 October 2018.

What is the purpose of this update?

This document tells you how the ANZ Cash Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Aon Saver Limited prepared this update in accordance with the Financial Markets Conduct Act 2013.

This information is not audited and may be updated.

Description of this fund

The ANZ Cash Fund aims to produce returns higher than bank deposits by investing in cash and short term fixed interest investments.

| | |
|--|-------------------|
| Total value of the fund | \$4,305,419 |
| Number of investors in the fund | 295 |
| Date the fund started | 30 September 2007 |

What are the risks of investing?

Risk indicator for the ANZ Cash Fund.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile using our [Aon KiwiSaver Scheme risk profiler](#).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 30 September 2018. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

| | Average over past 5 years | Past year |
|--|---------------------------|-----------|
| Annual return (after deductions for charges and tax) | 1.66% | 1.31% |
| Annual return (after deductions for charges but before tax) | 2.30% | 1.81% |
| Market index annual return (reflects no deduction for charges and tax) | 2.68% | 1.94% |

Market index description: S&P/NZX Bank Bill 90-Day Index.

Additional information about the market index is in the SIPO available from the scheme register at disclose-register.companiesoffice.govt.nz.

Annual return graph

This shows the return after fund charges and tax for each complete year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 September 2018.

Important: This does not tell you how the fund will perform in the future. Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the ANZ Cash Fund are charged fund charges. In the year to 31 March 2018, these were:

| | % of net asset value |
|---|----------------------|
| Total fund charges | 0.81% |
| Which are made up of | |
| Total management and administration charges including: | |
| Manager's basic fee | 0.65% |
| Other management and administration charges | 0.16% |
| Total performance-based fees | 0.00% |
| Other charges | |
| Annual membership fee | \$49.80* |

* Annual membership fees are the fixed dollar charges for membership in the Aon KiwiSaver Scheme, paid monthly. You will pay this fee only once each month even if you are invested in multiple funds within the Aon KiwiSaver Scheme. If you are under 18 this fee is reduced to \$40.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the 'Aon KiwiSaver Scheme Fees and other charges' document available from the offer register at disclose-register.companiesoffice.govt.nz for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Jacob had \$10,000 in the fund at the start of the year and didn't make any further contributions. At the end of the year, Jacob received a return after fund fees and tax were deducted of \$131 (that's 1.31% of his initial \$10,000). Jacob also paid \$49.80 in membership fees. This gives Jacob a total return of \$81.20 for the year.

What does this fund invest in?

Actual investment mix

This shows the type of assets that the fund invests in.
