What are the risks of investing?

Risk indicator¹ for the Russell LifePoints® Target Date 2055 Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile using our [Aon KiwiSaver Scheme risk profiler](#).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 31 March 2017¹. As a result the risk indicator may provide a less reliable indicator of the potential future volatility of the Fund. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future Fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this Fund.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). - ² The date the fund started was 19 February 2016. The Fund invests in underlying funds which charge an investment management fee. The investment fee included in the Annual Fund Charge disclosed is an estimated fee assuming that the actual asset mix equals the target investment mix shown in the PDS.
