

KiwiSaver Survey

September Quarter 2018

The local share market was more subdued following a strong June quarter. The S&P/NZX 50 Index still produced a helpful 4.6% over the third quarter to lift the index to 17.9% over the year. In general, it was a solid quarter for KiwiSaver funds, with all options producing positive results. Average multisector category returns ranged from 4.22% for the Aggressive category to 1.25% for the Conservative category.

Tim Murphy
| 25-Oct-18 |

Morningstar's quarterly KiwiSaver Survey is designed to help New Zealand investors assess the performance and other key characteristics of their KiwiSaver superannuation options. The accompanying tables show KiwiSaver fund returns for the one, three, five and ten years to 30 September 2018.

We hope you find this KiwiSaver survey helpful and welcome any feedback.

Market Commentary

Over the September quarter the S&P/NZX 50 Index was up by 4.6%, the result follows a very strong June quarter return of 7.5%, helping the index achieve 17.9% over the year. Australian shares made a smaller gain of 1.5% over the quarter, with telecommunications and information technology names in the index leading the way.

World shares rose over the September quarter, posting a 5.3% gain in local currency terms. U.S. shares increased as companies reported strong earnings growth and the U.S. economy

expanded at a brisk pace. The S&P 500 index gained 7.6% over the September quarter. Japanese shares also made strong gains over the quarter with the index up 8.7% in Japanese Yen.

Emerging markets struggled over the quarter. The two markets that performed particularly poor were Argentina and Turkey. While Brazil's presidential election in October also created uncertainty. In China, shares laboured amid concerns about the trade war with the U.S. and signs of a cooling economy.

The New Zealand REITs have been performing slightly better than the broader market. The S&P/NZX All Real Estate Index was up 5.7% over the quarter and 14.7% over the year. The outcome would have been better except for the weakness in the sector towards the end of September, as fears of rising interest rates have re-emerged in the wake of large rises in U.S. bond yields and more modest increases in local long-term yields. The same pattern was evident in Australia, with the sector falling towards the end of September as local bond rates rose. Over the September, the index was up 2.0% and 13.2% over the year.

Yet again, short-term interest rates have been steady over the past quarter, with the Reserve Bank of New Zealand, leaving monetary policy unchanged, most recently at the official cash rate review on 27 Sept., when it kept the OCR at 1.75%. The 90-day bank bill yield continues to trade around 1.95%. Long-term bond yields fell in recent months, with the 10-year government bonds yield reaching a low for the year of just above 2.5% in early September. More recently, the yield has moved up a bit, to 2.62%.

Quarterly Fund Manager Results

In general, the September quarter was a solid quarter for KiwiSaver funds, with all multisector options producing positive results over the three months. Average multisector category returns ranged from 4.22% for the Aggressive category to 1.25% for the Conservative category.

Top performers over the quarter against their peer group includes **Kiwi Wealth KiwiSaver Scheme Default Fund** 1.94% (Multisector Conservative), **Booster KiwiSaver Moderate** 2.03% (Multisector Moderate), **Booster KiwiSaver Socially Responsible Investment Balanced Fund** 3.25% (Multisector Balanced), **Booster KiwiSaver Balanced Growth** 3.99% (Multisector Growth), and **Booster KiwiSaver Geared Growth** 6.29% (Multisector Aggressive).

Pleasingly, all KiwiSaver funds managed to produce positive returns over the year across the multisector categories. Returns ranged from 18.15% down to 0.77%. The Aggressive category average recorded 13.2% for the year, followed by Growth (11.3%), Balanced (8.3%), Moderate (5.9%), and Conservative (4.5%).

It is most appropriate to evaluate performance of a KiwiSaver scheme by studying its long-term returns. **Milford KiwiSaver Active Growth Fund** tops the performance across all Multisector categories over 10 years. This approach started off with a much greater bias to Australasian equities, but has become more diversified as it has grown. Performance has stacked up favourably against peers, the strong return has come

from a bias to growth assets and exposure to Australasian credit.

Aon Russell Lifepoints has been one of the most consistent KiwiSaver performers across all multisector categories over the long term. Most of their options appear at or near the top of our multisector categories.

Market Share

KiwiSaver assets on the Morningstar database grew to more than NZ\$51.7 billion at 30 September 2018 from NZ\$43.2 billion at 30 September 2017. ANZ leads the market share with more than NZ\$12.9 billion. ASB is in second position, with a market share of 18.2%. Westpac holds third spot ahead of AMP, while Fisher Funds sits in fifth spot. The six largest KiwiSaver providers account for approximately 82% of assets on our database.

About This Survey

This survey groups KiwiSaver options according to their mix of income and growth assets, or “asset allocation”. This is one of the most important decisions to make when saving for retirement. The term “income assets” refers to cash and fixed interest securities that generally produce stable and reliable returns but offer little opportunity for long-term capital growth. Returns from “growth assets” such as property and shares will be erratic – as recent market volatility has demonstrated – but over time have shown greater capacity for increasing in value. The mixture of income and growth assets is the major determinant of potential return and volatility.

Investors may notice differences between the returns published in this survey and those they see elsewhere. There are several possible reasons for this. First, the returns published here are after fees but before tax. Second, we take the associated tax credit into consideration when calculating and publishing these returns, while some fund managers base their published performance figures on month-end unit prices only. ■■

Morningstar KiwiSaver Report: 30 September 2018

Please note:

- Past performance is not a guide to future performance. This year's best performers can easily be next year's worst.
- Understanding your risk profile, and the mix of growth and income assets is critical.
- Fees are the one constant that will always eat away at your returns. Take a close look at the cost of your KiwiSaver Scheme.

You should consider the advice in light of these matters and, if applicable, the relevant Product Disclosure Statement (in respect of Australian products) or Investment Statement (in respect of New Zealand products) before making any decision to invest. Neither Morningstar, nor Morningstar's subsidiaries, nor Morningstar's employees can provide you with personalised financial advice. To obtain advice tailored to your particular circumstances, please contact a professional financial adviser. Please refer to our Financial Services Guide (FSG) for more information www.morningstar.com.au/fsg.asp Returns are before tax and after fees. The performance for ASB, AMP, Forsyth Barr and Tower reflects fees that are charged as a percentage of your account balance and paid by cancelling units. Please contact Morningstar if you require clarification. Morningstar requested a (Total Expense Ratio) TER to be provided and calculated by Providers in line with the IOSCO international standard calculation, excluding dollar-based account fees. The dollar-based account or membership fees are payable in addition to the other fees captured in the TER, and are not reflected in the fund's performance. Und. = Undisclosed. * - Performance numbers supplied directly from the provider rather than calculated independently by Morningstar. ** - Median rather than a mean. *** - Minimum fee up to \$40/50 depending on option is charged, inclusive of other costs. **** - \$40 fee but \$0 if balance is over \$5,000.
